THE FLAME DETECTOR TEST LAMP

SENSE-WARE is a manufacturer and international operating trading company which sells high quality safety products since 2001. Our mission is to supply our customers products that fulfill their needs in the safest and most simple way. The key to our success is that we continuously update our technical knowledge.

SENSE-WARE is an independent player in the market as a manufacturer of universal UV and UV/IR Flame detector Testing equipment. The [T-229/4P Test Lamp](#) was developed in 2004. Four generations later the current Test Lamp sells all over the world mainly in Marine applications. Continuous improvement of the design and manufacturing procedures makes the T-229/4P the most reliable universal Flame detector tester in the market.

WHY SENSE-WARE?

- ✓ Universal Flame detector test lamps
- ✓ Many years of experience in Flame detection
- ✓ Up to date technical knowledge and constant product development
- ✓ A certified quality program according to ISO 9001

FEATURES

UNIVERSAL

The T-229/4P Test Lamp is suitable for all UV Flame detectors and (Single Frequency) IR Flame detectors or a combination of UV and (Single Frequency) IR. Not suitable for Dual IR or Triple IR Flame detectors.

LONG RANGE

The T-229/4P Test Lamp consists a broadband 100W source that emits UV and IR energy. Most Flame detectors will be activated at a distance of more than 4 meters with a full Battery.

EASY TO OPERATE

The powerful rechargeable battery lasts 10 - 15 minutes under normal conditions. Simply select the Flame detector type with the switch on the side of the housing and pull the trigger to operate the Test Lamp.

CARRYING CASE

The carrying case protects the T-229/4P Test Lamp and also stores the charger. It keeps the reflector of the Test Lamp away from dust while in storage.

SENSE-WARE UNIVERSAL TEST LAMPS

SENSE-WARE manufactures universal UV/IR flame detector test lamps
